DETAILED ACTION

Election/Restrictions

 - I. Claims 1-6, drawn to the determination of a parallel execution of data processes is capable, classified in class 717, subclass 119.
 - II. Claims 7-13, drawn to layout processing using images, classified in class 715, subclass 517.
2. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I, II, and III has separate utility such the determination of a parallel execution of data processes is capable and layout processing using images. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

In addition, because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
